COMMISSIONS

Pro Accounts

Our commission on Pro Accounts pays for our clearing and aggregation costs, together with our cost of providing the service to you.

Commissions are charged in the Account Currency and are based on the number of standard Contracts bought or sold in each transaction. Where a fraction of a standard Contract is dealt the charge is made on a pro-rata basis.

The table below sets out the commissions payable on FX and Bullion transactions on Pro Accounts when you open a Position.

| Account Currency | Per Standard Contract | Account Currency | Per Standard Contract |
|------------------|-----------------------|------------------|-----------------------|
| AUD | \$7.00 | JPY | ¥850 |
| CAD | \$9.00 | NZD | \$11.00 |

Standard Accounts

Our transaction fees are incorporated into the bid-offer spread for each Product (our spread). Because we deal as principal, the prices we offer you may not be the same as those in the Underlying Market and may be wider or narrower.

The price offered to you may depend upon several factors including transaction size, term of the Product, our business relationship with you, the prevailing Underlying Market rates and in the case of swaps and rollovers on the differing interest rates applicable to the currency pair involved in a FX transaction. Commissions will be charged for US Share CFDs on the US888-live server effective 14 February 2022.

Remuneration of Introducing Brokers or other partners

We may remunerate a third party for introducing you to us in the form of wider spreads, commissions, or other charges payable by you.

FEES & CHARGES

Fees and charges apply to Contracts as follows:

| Charges Benefits and Adjustments | Applicable Contract types |
|----------------------------------|--|
| Financing Charge/Benefit | Margin FX Contract Bullion Spot CFDs Commodity Cash CFDs Index Cash CFDs Cryptocurrency CFDs Share CFDs |
| Rollover Charge/Benefit | Commodity Futures CFD Index Futures CFDs |
| Dividend Adjustments | Index Cash CFDs Share CFDs |

Financing Fees

The Financing fee is an adjustment reflecting the relative difference in interest rates or yield on the Underlying Instruments.

A Client Account will either be credited or debited with financing fees based on open Positions as at the close of each Business Day. Financing fees accrue in each positions “Swap” field in MT4 and MT5 whilst a Position remains open and are credited or debited to Client Accounts when the trade is closed.

Financing fees are calculated in relation to the counter currency and are converted to and applied in the Account Currency.

Financing fees are subject to change and are available within the Trading Platform.

FX & Bullion Spot CFD Financing

If you are long a Contract where the platform’s swap rate for long Positions is a positive value, you will accrue a Financing Benefit. If you are long on a Contract where the swap rate for long Positions is a negative value, you will accrue a Financing Charge.

If you are short a Contract where the platform’ swap rate for short Positions is a positive value, you will accrue a Financing Benefit. If you are short on a Contract where the swap rate for short Positions is a negative value, you will accrue a Financing Charge.

In certain interest rate market conditions, the swap rate may be negative for both long and short Positions.

We apply Financing fees daily and usually in the 30 seconds before 5pm New York close. Currency pairs will have triple daily swaps applied on either Wednesday or Thursday in order to reflect the Underlying Market Settlement Date rolling over the weekend. The Product Schedule displays, for each pair, which day triple swaps are applied.

We may not incorporate short currency holidays into the swap rate calculation but may for extended currency holidays periods, for example Lunar New Year and Golden Week.

Swap Free Accounts

Swap free Accounts are not subject to Financing Charges or Benefits on FX Margin Contracts, Bullion Spot CFDs and Cash CFDs. We reserve the right to revoke the swap free status of any live account considered to be misused, trading in a suspicious manner or operating outside the realms of good faith.

Futures CFD Rollovers

The principle of the Futures CFD rollover process is that traders will neither profit nor lose from the CFD rolling from the current underlying futures price to the next.

A rollover will arise in a Futures CFD when the underlying front month futures contract is approaching the Expiry Date of the Underlying Instrument and we change our CFD pricing from the front month to the Next Serial Futures Contract. When the new price feed takes effect, this will immediately create a gain or loss upon your open Position. This profit or loss will depend upon your Position size and direction, the price differential of the expiring and the new Underlying Instrument upon which the price will be now based.

You will be credited or debited with a Rollover Charge or Rollover Benefit that reflects the buying and selling of the expiring and next Underlying Instrument contract. For example, if you have incurred a profit on the change to the new Contract Price you will receive a Rollover Charge which will offset the gain. If you incurred a loss on the change to the new Contract Price you will receive a Rollover Benefit which will offset the loss.

We typically switch from using the front month to the Next Serial Futures Contract 1-2 trading days prior to the Underlying Instrument's last trading day when liquidity can be limited.

The rollover dates can be found on our Website.

Index Cash CFD Finance Charges

If you keep an Index Cash CFD Position open overnight (after 5pm New York time) we will post a finance adjustment to your open trades in the form of a Financing Charge or Financing Benefit, to reflect the cost of funding your Position. This finance adjustment is based upon a central bank financing reference rate (FRR) relevant to the symbol and has our margin applied. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Index CFD Dividend Adjustments

Index CFDs are made up of a group of shares that may pay dividends throughout the year. When a dividend is paid on a share, the value of the share will drop and therefore so does the value of the Index. Dividend adjustments are applied on these Products to negate the impact of the drop in Index price.

Short Positions will be positively impacted by the drop in Index price, so you will be debited the dividend adjustment value. Long Positions are negatively impacted so you are credited the dividend adjustment.

Commodity CFD Finance Charges

Finance rates for Commodity Cash CFDs reflect the carry cost of our liquidity sources plus our margin and will have the potential to change daily.

You can view the current finance rates on the Trading Platform. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Cryptocurrency CFD Finance Charges

Finance rates for Cryptocurrency CFDs reflect the carry cost of our liquidity sources plus our margin and will have the potential to change daily.

You can view the current finance rates on the Trading Platform. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Share CFD Finance Charges

Finance rates for Share CFDs reflect the carry cost of our liquidity sources plus our margin and will have the potential to change daily.

You can view the current finance rates on the Trading Platform. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Share CFD Dividend Adjustments

When a dividend is paid on a share, the value of the share price will drop. Dividend adjustments are applied on these Products to negate the impact of the drop in price.

Short Positions will be positively impacted by the drop in price, so you will be debited the dividend adjustment value. Long Positions are negatively impacted so you are credited the dividend adjustment.

CRYPTOCURRENCY PRICING

Cryptocurrencies are extremely volatile and can move or jump in price with no apparent reason due to lack of liquidity. There is little or no fundamental reasoning behind its pricing and as such trading Cryptocurrency CFDs pose a significant risk to you.

MT4 cannot process prices under the 0.00001 price level therefore limiting the lowest possible price we are able to quote to you. In the event an asset price drops below or approaches this level we reserve the right to withdraw the product immediately and will liquidate all positions in good faith at the market rate we deem appropriate for the situation.

Cryptocurrency Hard Fork Events

If a Cryptocurrency splits into two, new coins are created, this is known as a "Hard Fork". We will generally follow the coin that has the majority consensus of Cryptocurrency users and will therefore use this as the basis for our prices. In addition, we will also consider the approach adopted by the exchanges or market-makers we deal with, which will help determine the action we take. We reserve the right to determine which Cryptocurrency unit has the majority consensus behind them.

As the Hard Fork results in a second Cryptocurrency, we reserve the right to create an equivalent Position on your Accounts to reflect this. However, this action is taken at our absolute discretion, and we have no obligation to do so. If the second Cryptocurrency is tradeable on major exchanges, which may or may not include the exchanges we deal with, we may choose to represent that value, but have no obligation to do so. We may do this by making the product available to close based on the valuation, or by booking a cash adjustment on your Accounts. If, within a reasonable timeframe, the second Cryptocurrency does not become tradeable, then we may void Positions that had previously been created at no value on your Accounts.

Over periods of substantial price volatility around fork events, we may take any action we consider necessary in accordance with our terms and conditions including suspending trading if we deem not to have reliable prices from the underlying market.

Cryptocurrency Soft Fork Events

A "Soft Fork" event reflects a Cryptocurrency change which influences the price but typically exhibit smaller price changes than a Hard Fork event. These events are simply passed through as an updated price of the symbol. We reserve the right but not the obligation to book a cash adjustment on client accounts for any material Soft Fork adjustments.

CONTRACT SPECIFICATIONS

The tables below show the Contract specifications which are correct as at the published date but are subject to change in accordance with the Client Agreement and PDS.

Pricing

The price of a CFD is based upon the value of the Underlying Instrument. Because we deal as principal, the prices we offer you may not be the same as those in the Underlying Market. We derive our price by applying our spread to the prevailing bid and offer price in the Underlying Instrument.

Market Hours

Trading Platform server time is based on GMT+3 when New York is observing Daylight Savings Time and GMT+2 when New York is observing Eastern Standard Time.

For non-US time zones their local and New York daylight savings changes will affect the sessions times relative to Trading Platform server time.

Indicative Spreads

Spreads published in the Trading Platform supersede the indicative spreads shown in the tables below. Indicative Spreads quoted below are median spread quoted for a Standard Account on the 13th of August 2021.

Actual spreads will reflect conditions in the Underlying Instrument and can substantially widen during news events and around the end of each trading session.

Max Trade Size (Lots)

The maximum trade sizes quoted in the contract specification tables are indicative of our typical default. We may at times elect to offer larger maximum sizes for major symbols. We reserve the right to reduce these at our discretion where we feel market conditions or other factors warrant it.
